CONCRETE COVER

– An intelligent
façade system

Visualisation: Harbour-front penthouse.
Material: Concrete Cover, Anthracite.

CONCRETE COVER

Concrete Cover was developed in cooperation with Nordic architects. The result is a façade cover that is rich in physical character and with a diverse play of colours, suited to the Nordic weather and its colour palette.

Concrete Cover is the Nordics' first ventilated concrete façade system and is suitable for both new builds and renovations.

Denmark's first ventilated concrete façade

- Pure genuine concrete
- Designed for subsequent dismantling
- Long life + 50 years
- Economically beneficial
- Broad colour diversity / 100% body-tinted
- Extremely fast mounting times
- Concrete elements mount without the use of screws

Visualisation: House in dune landscape with wooden doors and black steel detailing. Material: Concrete Cover, Anthracite

Sustainable façade system:

Concrete Cover was developed based on the principles of cradle to cradle and comes with KOMPROMENT's black box.
